PROFESSIONAL SUMMARY

Software Engineer with hands-on experience designing, building, testing, and deploying full-stack web applications using the MERN stack. Skilled at translating business requirements into working software, writing clean and reusable code, and integrating REST APIs and automation into existing solutions. Strong analytical and problem-solving ability with clear verbal and written communication. Comfortable in Agile/Scrum environments, quick to learn new tools and technologies, and focused on delivering quality code on time while taking ownership of successful implementation.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3, SQL

Frameworks & Libraries: React.js, Next.js, Node.js, Express.js, Redux, Tailwind CSS

Databases: MongoDB, SQL

Tools & Practices: Git, GitHub, Docker, REST APIs, GraphQL (familiar), Agile/Scrum, Automation & Peer Code Review, Debugging & Performance Optimization

Core Concepts: Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems, Computer Networks

PROJECTS

Wanderlust — MERN Stack Travel Listing Platform | Jan 2026

[Live Demo](#) | [GitHub](#)

- Analyzed business requirements and designed, built, and configured a full-stack travel listing application with reusable UI components and server-rendered views that work smoothly across devices.
- Designed and integrated RESTful APIs with MongoDB to support complete create, read, update, and delete functionality for listings.
- Tested and debugged rendering and data-flow issues, then delivered and configured the finished application for deployment on Render, ensuring quality and reliability.

Weather App — React.js | Oct 2025 – Dec 2025

[GitHub](#)

- Built a responsive React application that consumes the OpenWeather REST API to deliver real-time, city-based weather data aligned with user requirements.
- Used React Hooks to manage application state and update the UI in real time without page reloads, improving performance.
- Implemented error handling and responsive layouts, and tested across screen sizes to improve reliability and user experience.

EDUCATION

Bachelor of Engineering in Computer Science and Cyber Security | Jan 2022 – Jan 2026

Oriental College of Technology, Bhopal, India

Higher Secondary Education | 2021 | 84% — Government Higher Secondary School, Padariya Kachhi, Bhopal

High School Education | 2019 | 83.21% — Government Higher Secondary School, Padariya Kachhi, Bhopal

CERTIFICATIONS

- Data Structures and Algorithms (DSA) — Apna College, Oct 2024 – Oct 2025
- MERN Stack Development — Apna College, Oct 2024 – Oct 2025
